# COMMUNITY UPDATE

## DIESEL SPILL from PASSENGER TRAIN

As promised, please see the following updates.

- **Efforts are ongoing** to determine if any diesel has migrated away from the immediate spill site at the train tracks by:
  - putting in **temporary wells** to monitor along the train tracks; and
  - collecting **water samples** for the homes that are currently under a Water Advisory.

**Water delivery to the 14 homes remains ongoing.**

Please know, support will continue as required.

*Once further data has been collected, there will be Community Q&A scheduled.*

For immediate concerns or questions, please contact Seabird Island's Emergency Preparedness Coordinator, Danika Snook @ (604) 202-0834.

As more information becomes available, updates will continue to be shared via the main Seabird Island Facebook page.
