

ROWAN FORSETH

CANDIDATE FOR COUNCIL

Éy swáyel. Rowan Forseth tel skwix.
Tsel kw'e McIntyre.

My name is Rowan Forseth from the McIntyre family.

Like many of our people, I left home to learn, work, and gain the tools needed to understand how the world outside our community works. Through earning a Master's in Business and building experience in banking, financial risk analysis, negotiations, government, and strategic work, I learned how decisions are made, how resources are managed, and how opportunities are created.

I did not gain those skills to stay away. I gained them so I could bring them home.

Today I work for Seabird Island Band supporting grants, proposals, and planning that help bring funding and opportunity into our community. My work focuses on helping move forward priorities connected to housing, infrastructure, culture, and long-term development for our people.

I have always believed in discipline, hard work, and leading by example. I competed at the national level in track and field and cross-country, and today I continue to stay active through soccer and fitness because I believe healthy outlets, teamwork, and purpose matter in our community.

This is not just about my background. It is about our people.

I know our community has faced real challenges, but I also know how much strength, talent, and heart our people carry. I believe we need leadership that builds on that strength by creating more opportunity, supporting healing and wellness, and giving our youth and families something positive to believe in.

Our people deserve leadership that listens, works hard, plans ahead, and fights for real results. We need more opportunity for our own people, stronger support for youth and families, and a future our children can be proud of.

I am putting my name forward because I care deeply about this community and believe the tools and experience I have gained can help make a real difference here at home.

I left to learn the tools our people need, and now I am home to use them for our Nation and our future.
